- Nicole Evangelidis Nicole.evangelidis@sydney.edu.au

Overview

The international SONG-Tx Initiative aims to establish core outcomes for research (clinical trials) in kidney transplantation based on the shared priorities of patients, caregivers, clinicians, researchers, policy makers, and industry. This will help to ensure that research measures and reports outcomes that are meaningful and relevant to kidney transplant recipients, their family, and clinicians involved in their care.

Objectives

The objectives of the SONG-Tx workshop are to:

- Provide an overview of the SONG-Tx process and results
- Review and discuss the potential core outcomes set for trials and other forms of research in kidney transplantation
- Develop and discuss implementation strategies and action plans

Participants

This workshop brings together key stakeholders who have knowledge, experience or interest in kidney transplantation outcomes for trials and other types of research. Participants will include patients who have knowledge or experience with kidney transplant and their family members, patient representatives; clinicians (nephrologists, surgeons, other physicians, nurses, allied health professionals); policy makers, regulators, funders; researchers and industry.

Program

Time	Session
12:30 – 12:45	Registration and lunch
12:45 – 1:00	Welcome and introduction to the SONG-Tx Initiative <i>Jeremy Chapman</i>
1:00 – 1:15	Overview of the SONG-Tx process and results <i>Allison Tong</i>
1:15 – 1:50	Break out discussion groups <i>Main facilitator: John Gill</i> <ul style="list-style-type: none">• Review and discuss SONG-Tx results• Develop implementation strategies and action plans
1:50 – 2:20	Plenary discussion with feedback from break out groups <i>John Gill</i>
2:20 – 2:30	Closing remarks <i>Jeremy Chapman</i>

Participants and contributors

The participants include patients, caregivers/family members, healthcare providers, researchers, and policy makers. **NB. *Indicates attendance at the workshop**

Contributors who are unable to attend the workshop will have the opportunity to provide feedback on the pre-workshop materials and on the final report/publication.
