Brussels, 20 July 2017

Dear Colleagues,

On behalf of the International Society of Nephrology, we are very pleased to acknowledge and endorse the global Standardised Outcomes in Nephrology (SONG) initiative.

Please feel free to publicize our endorsement of the Initiative to the public and the patients you serve as an indication that our organization embraces the SONG core outcome sets, which will help to ensure that critically important outcomes are consistently measured and reported in trials.

The ISN will facilitate the dissemination and implementation of core outcome domains as appropriate. We will also advise our members to use SONG core outcomes in trials and other types of clinical research.

Finally, we congratulate SONG leadership for their accomplishments so far, and we look forward to further extend the collaboration between our two organizations in the future.

With best wishes,

David Harris
ISN President, 2017-2019
